Advanced Bionics is the Superior Choice for Hearing

Hear Your Best with Harmony

How Well Can You Hear with Your Hearing Aids?

If you're struggling to hear in noisy settings, talk with loved ones on the phone, listen to your favorite songs, or catch little details like your grandchildren's giggles, then you're not hearing as well as you'd like to with your hearing aids. Cochlear implants can bring the rich world of sound back for a more complete hearing experience and deeper connections with your friends and family.

At home and on the town, many active adults, including seniors, hear better with AB's Harmony™ HiResolution™ Bionic Ear System. Only AB combines the highest-resolution sound with convenient wearing options that are easy to use each and every day.

Answers...

Did You Know that Cochlear Implant Systems...

- Are covered by more than 90% of healthcare plans, including Medicare and Medicaid. You can afford to hear your world!
- Are designed to help you hear and communicate in noisy settings, from bustling restaurants to busy airports. With AB, you may converse more easily than ever before.
- Provide simple wireless connectivity to cell phones, MP3 players, and other audio devices. Talk on the phone or sing along to a catchy song.
- Are easy to use. There's no need to fumble with dials, switches, or remote controls.
- Offer different wearing options to suit your needs. Choose from a lightweight on-the-ear wearing option or a discreet processor that can be concealed under clothing with nothing worn on the ear at all.
- Utilize rechargeable batteries that are easy to operate and last for years. Unlike hearing aids, you won't have to fumble with small compartments to load little batteries.

"I take my grandchildren to the movies and enjoy laughing with them because I can hear the dialogue. There is nothing better than to tell your grandchildren you love them. I can do that now and hear them say they love me, too."

—Evelyn Gardner, implanted at age 63, bilaterally implanted at age 64

To connect with Evelyn or another cochlear implant recipient who understands what you are going through, contact the Bionic Ear Association.

We're Here So You Hear

The mission of the Bionic Ear Association (BEA) is to improve the quality of life of individuals with severe-to-profound hearing loss by providing valuable information, education, awareness, and guidance on cochlear implants. Staffed with a network of hearing health professionals and cochlear implant recipients, the BEA offers important support services to help you Hear and Be Heard.

Are You Still Struggling to Hear with Hearing Aids?

You may be a candidate for cochlear implants. Contact the BEA today to learn more about cochlear implant candidacy and how the Harmony System helps recipients of all ages hear their best.
