## LITERACY STRATEGIES for the Very Young Child

By Krista S. Heavner, MS, CCC-SLP/LSLS Cert AVT®

When you begin planning therapy for the infant with hearing loss, the first thought may be that books are not appropriate due to a baby's lack of maturity and attention. However, the opposite is actually true. You can and should begin introducing books to children when they are in the womb and certainly as soon as the child is born. Below are several charts designed to provide you with strategies on how to facilitate pre-literacy development in the very young child.

Therapy for the Infant (0–6 Months)				
The Adult	The Child	Book Features		
<ul> <li>The Adult</li> <li>Modeling (for parents)</li> <li>Exposure to print</li> <li>Familiarity with books</li> <li>Familiarity with adult voice</li> <li>Point to pictures</li> <li>Use books with bright colors and tactile properties</li> <li>Parentese (acoustic highlighting with the voice)</li> <li>Read a few pages at a time</li> </ul>	<ul> <li>Listen and observe</li> <li>Bonding with the adult</li> <li>By 6 months of age, the child wants to hold/touch/eat the book</li> <li>Increased interest in pictures, bright and bold colors</li> <li>Interest in pictures of faces</li> </ul>	<ul> <li>Simple, large pictures</li> <li>Bright designs</li> <li>Chunky/board books</li> <li>Fold-out books</li> <li>Cloth/vinyl books</li> </ul>		
<ul><li>Watch for cues to turn the page</li><li>Use simple phrases</li><li>Make up your own words</li></ul>				

Therapy for the Infant (6–12 Months)				
The Adult	The Child	Book Features		
Continue with parentese	Attends to pictures	Board books		
Follow child's lead—opportunity to	<ul> <li>Recognizes familiar objects</li> </ul>	<ul> <li>Pictures of babies</li> </ul>
