Support for the Journey to Hearing

Provided by Advanced Bionics

maximize

Your Hearing Potential

Learning to listen again with a hearing aid or a cochlear implant is a rewarding journey that takes patience, perseverance, and a positive attitude. Like learning any activity, hearing your personal best requires time and effort. The more you put into improving your or your child's listening skills, the more rewards you will get out of it.

As part of our commitment to putting you first, AB provides important services and resources to support you and your family throughout the journey to hearing, including:

- The Listening Room™
- Online Education
- Tools for Schools™

All of these FREE resources are conveniently available online and easily accessed at AdvancedBionics.com.

listen

The Listening Room

Resources for Developing Listening and Language Skills

The Listening Room™ is a one-of-a-kind website that gives you a foundation of interactive and uniquely designed, FREE practice activities to improve listening skills so that communicating with others is a successful experience. Exercises can be done alone; with a therapist, parent, or listening coach; on paper; or with a computer or MP3 player.

Activities for Infants and Toddlers:

- Revolve around a young child's day, targeting important moments such as getting dressed, eating, playing, and bath time
- Incorporate songs and finger plays to engage your child in communicating and interacting

Activities for Preschool and School-Age Children:

- Strengthen vocabulary and concepts that they are learning in the classroom
- Include weekly activities, monthly murals
- Support listening and language development in the water
- Feature songs, auditory discrimination games, and much more

Activities for Teens and Adults

- Maximize hearing performance with a variety of activities to help you practice listening
- Offer exercises to practice on the phone before talking with others

succeed

Tools for Schools

Everything You Need for a Child to Succeed

Many parents choose cochlear implants for their children to help them reach their academic potential. Because of this important, life-changing decision, children who are implanted at an early age may be able to attend mainstream schools by kindergarten. AB supports your child's scholastic efforts with Tools for Schools™ (TFS).

Supporting children with one or more cochlear implants requires a team approach. Designed to help students succeed in the classroom, TFS provides educators with the practical tools and online materials to make your child's educational journey easier, including:

- Product Information and Troubleshooting
- Educational Management
- Listening and Language Materials and Support
- Assessment Tools
- Tools for Toddlers
- Reference Materials

Offered to parents, educators, and therapists, TFS is a valuable asset for your child's education!

Download a variety of FREE, helpful resources today at [AdvancedBionics.com/TFS](https://www.advancedbionics.com/TFS)

Hear and Be Heard

The mission of the Bionic Ear Association (BEA) is to improve the quality of life of individuals with severe-to-profound hearing loss by providing valuable information, education, awareness, and guidance on cochlear implants. Staffed with a network of hearing health professionals and cochlear implant recipients, the BEA offers important support services to help you Hear and Be Heard.

Community

When you or your child receives a cochlear implant system from AB, you also become part of a lively community that's eager to provide answers, support, and words of encouragement, making your journey to hearing more fulfilling.

Contact the BEA to receive our newsletter with information on new products, events, and programs for your journey to hearing.
