

Providing the same quality care in-clinic or remotely WITH THE AB REMOTE SUPPORT APP

With full access to all diagnostic and programming features, you can synchronously program your patients' hearing systems and incorporate real time feedback using Target CI v1.5 and your patient's smartphone.^{1,2}

As if they were in the clinic, you can...

Discuss your patient's progress

Run eCAP measures & current impedances

Fully program any new or previous map in real-time

Observe patients as you start/stop stimulation

Fine-tune bimodal systems in the same session

Confirm optimal settings before recipient use

Securely save data only at clinic and processor
